

Let's Get Social!

Join us in learning skills to support successful social interactions. Based on the AIM® curriculum, this group is for children aged 5-7 years old who want to learn mindfulness, cooperation, sharing, and conversation skills. These skills are important for children to interact appropriately with others and make friends. Children will participate in motivating games that will support learning social skills. Parents are encouraged to participate in the sessions.

To be eligible, children must have some language ability, follow simple instructions, and attend the group independently.
